Comment: I strongly believe citizens have the right to act freely in their business endeavors. It has been proven in our nation's history that free markets allow for competition, decrease costs, as well as reduces unethical behavior. I have a really hard time with the Federal Government or Administrative Agency to require businesses to participate in annual stress tests. No one knows a company's needs better than the hard working business owners and their employees to make the tough decisions they face on a daily basis, and agency involvement is clearly unnecessary in regard to annual stress tests. I am all for a healthier nation and stress free work environment, but I believe there are more effective ways than requiring businesses to mandatory stress tests. For these reasons I wish for you to reconsider this proposal.
